5G-MAG Reference Tools Developer Community

Transforming specifications into reference implementations

5G MAG REFERENCE < TOOLS />

Bringing **specs** to **life**

- Standards validation, interop, early prototyping and testing
- Ready-to-use code in production environments and as benchmark
- Shared development effort avoids duplication across companies
- Transparency, trust and collaborative enhancements

More information at developer.5g-mag.com

5G-MAG Reference Tools' Projects

REFERENCE TOOLS

- Streaming, Media Delivery and Data Collection
- 5G Broadcast for TV, Radio and Emergency Alerts
- Multicast and Broadcast Services in 5G Networks
- XR: 3D Scenes and Avatar Communications
- Volumetric Video and Beyond 2D Video Experiences
- Test-beds and Evaluation Frameworks
- Auxiliary tools common to various projects
- External tools from related projects
- 3GPP Radio Access Network and Core Platforms

5G-MAG Reference Tools - Roadmaps

5G-MAG Reference Tools - Roadmaps

All | 5G Media Streaming | 5GC Components | UE Data Collection | 5G Broadcast | Emergency Alerts 5GBC | Multicast Broadcast Se | Multimedia Content De | XR Media with MPEG-I | V3C Immersive Platform

label:"Project: 5G Media Streaming"

Candidates 1
This is a candidate for future work.
- Getting-Started #126 — Advanced Media Delivery (AMD) - In-band reporting of CMCD information

Under Study 1
This is under study.
- Getting-Started #137 — Cloud Deployment support

Under Development 4
This is actively being worked on.
- Getting-Started #132 — Dynamic Policies (M1 Policy Templates API + M5 Dynamic Policies API)

Completed 0
This has been completed.

Completed + Tested 6
- Getting-Started #134 — Consumption collection and reporting
- Getting-Started #130 — Implementation of M1d Provisioning APIs
- Getting-Started #133 — QoE metrics collection and reporting
- Getting-Started #129 — Implementation of AF to AS RESTful OpenAPI (M3)
- Getting-Started #128 — Support for basic media session handling (Application Function + Media Session Handler)
- Getting-Started #127 — Support for basic media stream handling (Application Server + Media Stream Handler)

Software Contributors and License Model

The 5G-MAG Reference Tools software makes use of **various licenses** to distribute and accept contributions from the community, including the:

5G-MAG Public License v1.0

More information at https://www.5g-mag.com/license

The **5G-MAG Public License v1.0** is a modified version of the Apache 2.0 license which includes a **patent clause** to allow contributors to make patent license available to third parties under **FRAND** (fair, reasonable and non-discriminatory) terms for **commercial** exploitation. The code remains free for non-commercial, study, testing and research purposes.

Contributor License Agreement

More information at https://www.5g-mag.com/license

Individuals and/or **companies** with a signed **Contributor License Agreement (CLA)** can contribute code. Reach out to us in case of doubts and any clarification.
